Projects

Online Shopping Site – MERN Stack	2025
• Developed a clothing e-commerce website with secure login & checkout. • Built product browsing with search, filter & cart management. • Developed REST APIs with MongoDB integration for storing and retrieving product details.	
Hospital Appointment Management System – Django, SQLite	2025
• Developed a Django app for doctor listings and patient bookings. • Implemented secure form submission and data handling with Django Models and Forms. • Managed doctors and department information with relational database integration.	
Resume Analyzer – Python, Streamlit, NLP	2025
• Built a Streamlit web app that evaluates resume–job fit using NLP. • Used Sentence Transformers + TF-IDF to calculate a weighted match score. • Implemented PDF extraction, text cleaning, and visual match feedback for users.	
AI Summarizer – React, Flask, GPT API	2025
• Developed an AI Summarizer (React + Flask) supporting text, PDF & YouTube. • Used OpenAI GPT to automatically generate concise text summaries.	
Personal Car Buying Assistant – Python, Django, ML (sklearn)	2024
• Built a web-based ML app using Python and Django to predict used car prices. • Preprocessed data with Pandas and NumPy, and trained a Linear Regression model using scikit-learn. • Achieved accurate predictions on a dataset of 11,000+ used cars from Kaggle.	
Personalized Exercise Recommendation System – Django, SQLite	2023
• Developed a Django web app recommending exercises based on user attributes. • Implemented backend logic and database (SQLite) for dynamic recommendations.
